ICH M1 Points to Consider Work Plan
July 25, 2025

Topic Adoption date: 1999

This working group develops and maintains the MedDRA Points to consider (PtC) documents. As new areas of MedDRA are developed, the documents require refinement and updating. The two main documents are "MedDRA Term Selection" PtC and "MedDRA Data Retrieval and Presentation" PtC updated annually in line with the March release of MedDRA. The PtC "Companion Document" provides additional guidance on high level topics pertaining to the use of MedDRA and may be updated as needed. The initial version of the "Companion Document" was released in June 2018, covering data quality and medication errors. A new section on distributed/manufactured 'Product quality issues' was available in October 2020 and new section on "Manufacturing and quality system issues" was available in September 2024. This WG also provides guidance on ICH MedDRA initiatives when requested by the MedDRA Steering Committee (SC), as well as recommendations for development or not related to requests for new Standardise MedDRA Queries (SMQs).
