ICH M7 Sub-Group Work Plan
July 25, 2025

Topic Adoption date: *June 2024*

Rapporteur: *Dr. Krista Dobo, PhRMA*

Regulatory Chair: *Dr. Alisa Vespa, Health Canada, Canada*

Last Face-to-Face Meeting: *Madrid, Spain, May 2025*

1. Key milestones

1.a. Current status of key milestones

Past completion date	Milestone
Jun. 2024	*Topic Adoption by the ICH Assembly on 4 June 2024*
Dec. 2024	*Mutual Understanding Presentation Series: October – December 2024*
May. 2025	*Final Concept Paper Endorsed by the ICH Management Committee on May 2025*

1.b. Key Deliverables

MC Approval Date	Deliverable
May. 2025	*ICH M7 Addendum on Risk Assessment and Control of N-Nitrosamine Impurities*
May. 2025	*Compound specific monographs for some N-nitrosamines*
May. 2025	*M7 Sub-Group Training materials*

1.c. Future anticipated key milestones

Expected future completion date	Milestone
Jun. 2028	*Step 1 - Consensus reached on draft Technical Documents*
Aug. 2028	*Step 2a/2b - Confirmation of Technical Document by Assembly, Adoption of draft guideline by Regulatory Members*
Dec. 2029	*Step 3 – Public consultation and address comments*

Mar. 2030	*Step 4 – Finalize Guidance*

2. Timeline for specific tasks

Beginning date	End date	Task / Activity	Details
May. 2025	*Nov. 2025*	*Data gathering/ analyses /discussions related to design and interpretation of the enhanced Ames test (EAT) to assess mutagenic hazard*	*Material and presentations being developed to support advancement of the topic at the Singapore meeting*
May 2025	*Sept 2025*	*Benchmark dose (BMD) methodology education*	*An education session on the use of BMD methodology to analyze carcinogenicity data and support the derivation of Acceptable Intakes is being planned for Sept 2025*
May. 2025	*Nov. 2025*	*Draft nitrosamine Monographs*	*Draft monographs and methodology to derive Acceptable Intakes are being prepared for the Singapore meeting*
May. 2025	*Nov. 2025*	*Structural feature prevalence analysis*	*Analysis completed to inform discussions regarding the value of incorporating additional structural features into the carcinogenic potency categorization approach (CPCA) framework*
May. 2025	*Nov. 2025*	*Data gathering/analyses/ discussions related to less-than-lifetime (LTL) framework and in vivo mutation study design and interpretation*	*Material and presentations being developed to support advancement of these topics at the Singapore meeting*
